FULL-STACK WEB DEVELOPER

Passionate, problem-solving lover with experience building RESTful full-stack web applications using Ruby on Rails, JavaScript, React, SQL. Possess strong skills in Ruby on Rails and JavaScript-based programming, team-building, and project management.

TECHNICAL SKILLS

Ruby, Ruby on Rails, JavaScript, React.js, Google Firebase, HTML, CSS, APIs, Git, eCommerce

TECHNICAL PROJECTS

Amaclone - Github | Demo

E-commerce website with cloud database hosted through Firebase. A developer can manage user data, and users have the ease of making payment using Stripe which is integrated from its library.

- Utilized and deployed application using Google's Firebase console to host application and store user data
- BEM convention for easy readability in styling components. To maintain clean code when the application scales with more components.
- Developed React as Front-end with Redux to store data that can be used throughout the application

I - Tripped! - Github | Demo

Road trip logger where users can log their trip and see the history of their destination.

- Created a custom database and REST API using Active Record, PostgreSQL, and Ruby on Rails
- Utilized JWT auth on Back-end for login authorization.
- Maintained workflow in Git by creating branches to work on different features. By doing so, ensuring that we have a separate working branch while working on another feature to prevent unnecessary debugging.

WDM (Web Digital Music) - Github | Demo

A digital drum instrument where you can create beats and click on a beat and play sounds based on where you click on the app.

- JavaScript project using audio files to create sound on click.
- Pair programmed with a partner who worked on the front-end using JavaScript as I worked on the back-end and CSS styling of the application. Worked on one source and maintain positive feedback by merging our work before pushing it to the main file in GitHub.

EXPERIENCE

Amazon   Staten Island, NY
Warehouse Associate   11/2017 - 10/2020

- Achieved consistent high productivity rate during my time as a packing associate of 300 boxes per hour
- Trained over 100 onboarding associates in their new roles as a direct role Ambassador
- Oversaw outgoing products, communicated with managers and Operation leaders in getting shipments out of the facility on-time. My team has trained 25+ associates coming into the role.
